# How to Locate Additional EDI Details on an ACH Transaction

Log into online banking at https://my.texasgulfbank.com/login. Click on the **account tile**.

Locate the transaction. Most ACH transactions include key information directly within the transaction details. If additional extended EDI information is available, the transaction will display an **EDI Transaction** indicator. Simply click on the transaction to view the full details.

The details screen will appear. Click on **Download EDI information**. Then click on **Download details (txt).**
